More Agility For Smaller Businesses

Company In Brief

AgileMind Technologies is an Eastern European offshore software development company with a primary focus on small and medium-sized businesses. Located in Belarus, AgileMind couples the advantages of this 'Silicon Valley' of the former USSR with its deep outsourcing know-how, enabling SMBs worldwide to capitalize and grow on IT in today's fiercely competitive business world.

Service Offerings

Our service offerings embrace a wide variety of activities that can vary depending on the customer's specific business case -- from custom (bespoke) software solution development and IT consulting to business process automation and software support. The wide range of the software services we offer enables us to serve as a one-stop IT-service provider for our clients.

The scope of our services includes:

- R&D & IT-Consulting
- Development of custom turn-key software solutions the meet your business requirements (including Consulting & Business Case Analysis, Implementation, Testing, Customer Training and Support)
- Business Process Automation (including e.g. Customer and Partner Relationship Management and Retention, Sales Force and Workflow Automation etc.)
- Reengineering & Upgrade of Legacy Systems
- Software Porting & Technology Migration
- Software Maintenance & Support

Irrespective of the specific services we provide, the goal is to deliver maximum business returns for the customer, while using the optimal technology and providing an unmatched cost/quality ratio.

Profound Java Know-how

AgileMind Technologies is primarily a Java software development company. Our team are all Java-certified, veteran software engineers, who have 5-6 software development experience on average, and enjoy tackling non-trivial, challenging tasks.

This Java specialization combined with our domain expertise is what gives us yet another competitive advantage when it comes to delivering robust, customizable, value-added software.

Well-armed with a variety of tools, deep technology know-how and a passion to excel, we at AgileMind educate our employees continuously to ensure the technical excellence of the solutions we provide.

The table below summarizes our technical know-how:

<p>Programming</p> <p>Java J2SE (Applets, Swing, AWT, etc.) J2EE (Servlets, JSP, EJB, JDBC, etc.) J2ME</p>	<p>Operating Systems</p> <p>Microsoft Windows GNU/Linux FreeBSD Sun Solaris PalmOS</p>	<p>Web & App Servers</p> <p>Tomcat JBoss BEA WebLogic Apache</p>

Communication

We at AgileMind place a special focus on the quality of communication during a software project, and are keeping the investment into foreign language studies of our employees at a significant level. Every Project Manager and/or software programmer of AgileMind has a good command of English and/or German languages, which ensures project communication is trouble-free.

We Know Your Needs

Being a small, responsive company has enabled us to better understand the unique needs of SMBs, and develop a set of best practices that ensure maximum value for every customer's case. Our goal is to deliver a software solution that fits your business needs best, while placing special emphasis on reliability, transparency and risk mitigation.
